On occasion, patients may inquire about the cost of surgery or you might need to have some ideas about surgical fees to help you in treatment planning. Below, please find our range of fees for common oral surgery procedures.

**This fee schedule is meant to be only for your information and assistance during your consultations with your patients. It is highly recommended to avoid giving exact fees to patients; we encourage a consultation with us first for an optimal evaluation and precise fees for the treatment needed.**

As you know, patients often accept the recommended treatment plan when they have great confidence in the surgeon and your plan. For more information on our financial protocol and effective referral process, please see the following in our website or your packet:
