

ENHANCE YOUR HEALING NATURALLY

endoret[®] (prgf[®])

Endogenous Regenerative Technology

- Promotes Healing
- Reduces Inflammation and Pain
- Decreases Swelling
- Decreases Risk of Infection

ENDORET (PRGF): high concentration of growth factors from your own blood: stimulates **tissue regeneration**, promotes **angiogenesis (development of new blood vessels)**, stimulates **cell migration**, increases **proliferation (the growth or production of cells)**, and stimulates **secretion of growth factors**

RECOMMENDED FOR: teeth extractions, dental implants, grafting, & other oral surgery procedures

> 2-4 TUBES OF YOUR OWN BLOOD □

> 15 MINUTES TO PROCESS
